MOHAMMED AZHARUDDIN

Summary

Highly proficient Full-Stack Developer with expertise in JavaScript, React, Node.js, Express, MongoDB, and SQL. Demonstrated ability to refactor legacy codebases, enhance performance, and implement scalable microservices architectures. Proven experience in integrating third-party APIs, designing responsive web applications, and streamlining software development processes using DevOps practices. Committed to delivering high-quality, user-centric solutions that exceed business objectives.

Skills

JavaScript, React, Node.js, Express, MongoDB, SQL, Docker, RESTful APIs, Data Structures, Algorithms, Object Oriented Programming, CSS, HTML

Education

Bachelor's degree in Computer Science, CGPA: 7.86
Hyderabad, Telangana

Experience

Google, Full-Stack Developer
- Collaborated with a team of frontend developers to design and implement a user-friendly web interface using HTML, CSS, and JavaScript.
- Integrated third-party APIs and services into the application to enhance its functionality and provide value-added services.
- Performed performance optimization and code refactoring to improve application efficiency and maintainability.
- Contributed to the development of a mobile application using React Native, providing a seamless user experience across multiple platforms.

Amazon, Full-Stack Developer
- Designed and developed a highly scalable, cloud-based e-commerce platform with Node.js, ReactJS, and AWS services, resulting in a 30% increase in conversion rates.
- Implemented a RESTful API using Python and Flask, integrating with a relational database to provide real-time data access and manipulation.
- Created and deployed a full-stack application using Java Spring Boot and MySQL, featuring user authentication, CRUD operations, and data validation.
- Utilized Docker and Kubernetes to containerize and deploy microservices, ensuring scalability and resilience of the application.

Accomplishments

- Refactored legacy codebase, improving performance by 30% and reducing code complexity by 25%.
- Developed and implemented a microservices architecture that enhanced scalability and reduced deployment time by 50%.
- Integrated multiple third-party APIs seamlessly, enabling seamless data exchange and improving user experience.
- Designed and built a responsive web application that exceeded performance benchmarks and met accessibility standards.
- Implemented DevOps practices, streamlining the software development process and reducing delivery time.

Awards

- Won the Best FullStack Developer of the Year award at the TechExcellence Awards 2023.
- Honored with the Exceptional Contributor award for outstanding contributions to the open-source FullStack project.
- Received the Rising Star award for exceptional contributions to the FullStack Developer community.
- Recognized as the Most Innovative FullStack Developer at the TechInnovation Awards 2022.

Certifications

- Certified ScrumMaster (CSM)
- AWS Certified Solutions Architect Associate
- Microsoft Certified Azure Developer Associate
- MongoDB Certified Developer Associate
